THE NATURAL CHOICE

FOR RESIDENTIAL ALUMINIUM WINDOW,
DOOR & CONSERVATORY SYSTEMS

DUALFRAME

THE NATURAL CHOICE FOR RESIDENTIAL ALUMINIUM WINDOW, DOOR & CONSERVATORY SYSTEMS

Sapa is an internationally renowned engineering group with a philosophy as strong as aluminium itself.

A philosophy that shapes the future of our living environment using one of the most versatile and ecological materials known to man - aluminium.

**OPEN THE DOOR TO THE BEST LOOK
IN HOME DESIGN AND INVEST IN
ALUMINIUM TO COMPLEMENT THE
PERSONALITY OF YOUR HOME.**

The new Sapa Dualframe range signals a new era in aluminium windows, doors and conservatories. It is the worthy successor to the distinguished Moniframe aluminium range, fitted in hundreds of thousands of UK homes and inherits many of the proven Moniframe characteristics.

Dualframe - one more way in which Sapa is constantly working to produce innovative and affordable aluminium systems to ensure they remain the preferred choice for your home, naturally.

BEAUTIFUL FEATURES & ULTIMATE PERFORMANCE WHATEVER THE EXTREME

Dualframe windows, doors and conservatories will enhance your home both inside and out. Their ultra slim lines and beautiful styling will provide years of virtually maintenance free pleasure.

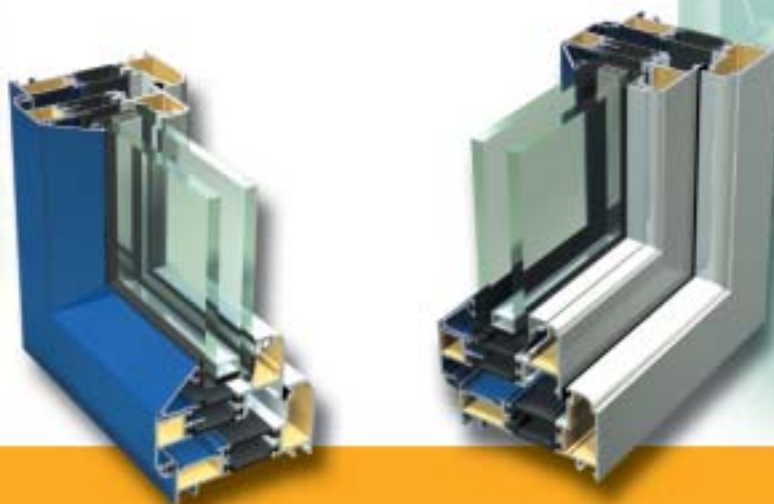

What's more, Dualframe means dual colour, so you can choose to have one colour of frame on the outside and another on the inside.

Thanks to aluminium's low rates of expansion and contraction, the frames are extremely stable and inherently durable. Dualframe windows, doors and conservatories also incorporate leading edge design features offering exceptional thermal performance properties.

The Dualframe range has also been independently tested by third party experts and has been proven to exceed the latest Building Regulations relating to the conservation of fuel and power (known as 'Part L').

- **EXCEEDS PART L BUILDING REGULATIONS 2002**
- **UNRIVALLED STRENGTH & SECURITY**
- **AVAILABLE IN A WIDE VARIETY OF COLOURS**
- **DUAL COLOUR OPTION (CHOOSE DIFFERENT COLOURS INSIDE AND OUT)**
-

The background is a collage of images: a large multi-story apartment building with a curved walkway, a close-up of a skylight, a brick house with a conservatory, a brick house with a front porch, and a patio with potted plants and a white metal chair.

HIGH SECURITY

FEEL SECURE AND SAFE WITHIN YOUR HOME

Strength and durability, low maintenance and great looks. What more could you want from your doors and windows? What about Security?

The moment you close a Dualframe door or window you have the strength of aluminium to protect you. Dualframe incorporates patented and proven security features, tested to the very latest British Standards, precisely fitted to resist 'unwelcome' visitors.

Because Dualframe doors, windows and conservatories are made from aluminium they behave favourably in all temperatures and extremes of weather.

ALUMINIUM & THE ENVIRONMENT

Aluminium is one of the earth's most abundant resources, which can be recycled again and again without losing any of its properties. Over 70% of aluminium used in building and construction will be recycled. Unlike PVCu, aluminium is resistant to ultra-violet light and does not discolour, become brittle or warp.

WHAT PEOPLE SEE IN ALUMINIUM

It would be hard to imagine a world devoid of the benefits of aluminium. Without the strength of aluminium there would be no commercial air travel, fuel-efficient engines in cars or high-speed rail and sea travel. Apply that technology to your home and imagine the strongest of all natural materials working for you. Working to make your home beautiful, secure and comfortable.
